NEW YORK.

PREFACE.

THE butter records in this volume (except those designated "official") have been received on the affidavits of the managers of the tests or the certificates of the owners of the cows tested, and their publication by the Club shall not in any wise be considered an *official endorsement* of their reliability.

The tests designated "official" were made under the supervision of committees appointed by the President of the Club.

All tests which appeared in Vols. I. and II. of the compilation of tests made by Messrs. Campbell Brown, Thos. H. Malone, Wm. J. Webster and M. M. Gardner have been marked in this volume by an asterisk (*) before the name of the tested animal.

The tests are arranged according to amount, the largest record being put first, followed by the next largest, and so on down to the lowest. When a number of tests occur of the same amount, the names of the tested animals are arranged in alphabetical order.

In the Index to Tested Cows the figures immediately following the Herd Register number of the animal is the amount of her test: e. g., 15.06 stands for 15 lbs. 6 oz. When an animal has more than one test in this volume, the largest only is given in the index, but the pages are given on which each of her tests may be found.

In the List of Sires, arranged alphabetically, the names of the tested cows are arranged under their sires' names according to the amount of their tests, the largest coming first. Where an animal has more than one test, the largest only is given. The same arrangement has been followed in the List of Dams.
